Crop Insured
All small grains (wheat, barley, and oats) are insurable if grown in a county on insurable acreage, where premium rates are provided, you have a share of the crop, and are planted for harvest as grain. Coverage for oats is available with the yield protection plan only. The trend adjustment option is available in Maryland, North Carolina, New Jersey, New York, Pennsylvania, Virginia, and West Virginia for wheat only, beginning in 2014.

Insurance Plans
Revenue Protection: Insurance coverage providing protection against revenue loss due to a production loss, price decline or increase, or a combination of both.
Revenue Protection with Harvest Price Exclusion: Insurance coverage providing protection only against revenue loss due to a production loss, price decline, or a combination of both.
Yield Protection: Insurance coverage only providing protection against a production loss.

Area Revenue Protection, Area Revenue Protection with Harvest Price and Area Yield Protection Plans are available for wheat in North Carolina and Maryland only. Wheat and barley may be covered with yield protection or revenue protection. Coverage for oats is available with yield protection only.

Causes of Loss
- Adverse weather conditions, including natural perils such as hail, frost, freeze, wind, drought, and excess moisture.
- Failure of irrigation water supply, if caused by an insured peril during the insurance year.
- Fire if caused by an insured peril during the insurance year.
- Insect damage, but not damage due to insufficient or improper application of control measures.
- Harvest price decline below the projected price when revenue protection is in effect.
- Plant disease, but not damage due to insufficient or improper application of control measures.
- Wildlife

Reporting Requirements
You must file a report of planted acreage with your crop insurance agent by the acreage reporting date established for your county. Since acreage reporting dates vary by crop and county, talk to your agent, or for more information see: www.rma.usda.gov/tools/

Late and Prevented Planting
These provisions provide protection on eligible acreage that is planted late or that cannot be planted by the final planting date. Please talk to your agent for more details.

This fact sheet gives only a general overview of the crop insurance program and is not a complete policy. For further information and an evaluation of your risk management needs, contact a crop insurance agent.
Duties in the Event of Damage or Loss
Notify your agent within 72 hours of your initial discovery of damage (but not later than 15 days after the end of the insurance period).

Coverage Levels and Premium Subsidies
The premium subsidy percentages and available coverage levels are shown below. Your share of the premium will be 100 percent minus the subsidy amount.

Catastrophic Risk Protection (CAT) coverage is fixed at 50 percent of your average yield and 55 percent of the price election. The cost for CAT coverage is an administrative fee of $300.

Loss Example
Assume the crop is wheat with an approved yield of 60 bushels per acre, 75-percent coverage level, 100-percent share and a one-acre basic unit. The projected price is $8.57 and the harvest price is $6.96. Due to an insurable cause of loss, the production-to-count is 15 bushels.

*For Revenue Protection, the insurance guarantee is equal to the production guarantee multiplied by the greater of the projected price or the harvest price. In example, Revenue Protection harvest guarantee increased to $385.65 (45 bushels per acre guarantee x $8.57 projected price).

Price Elections
Commodity Exchange Price Provisions (CEPP) contain information necessary to develop the projected price and the harvest price for the insured crop. The CEPP includes the price discovery period, release dates, boards of trade used, and additional pricing information. Talk to your agent, or for more information go to: www.rma.usda.gov/tools/pricediscovery.html
