Who should attend?
Experienced farm and ranch women wanting a more active role in the business aspects of their farm operations will find this program motivating, enjoyable, and practical. Participants say they find answers and friendship, grow more confident, improve their ag business skills, and establish community prestige.

“\textit{We created a program that gives women a comfortable place to share experiences and network while learning business, computer, and interpersonal skills.}”

Ruth Hambleton
Founder, Annie’s Project
Education for Farm Women

What are the benefits?
From this program farm women will increase their knowledge and professional skills in agricultural risk management through goal setting, networking among farm colleagues and industry professionals to meet goals, and discovering their personality type and how it affects working with others.

The cost to participate is $60 per person, which includes lunch, all course materials, and handouts. Pre-registration is required. Registration deadline is Friday, January 10, 2014. For more information, please contact the Cornell Cooperative Extension host site nearest to you. See back panel or visit www.NYAnniesProject.org.

Annie’s Project embodies a risk management perspective that helps to reduce risk exposure by analyzing legal, human resource, marketing, financial, and production factors in farm business decision making. The program is directed to experienced farm women with a passion for business and an involvement in today’s farming industry.

Now in its third year in New York State, Annie’s Project is a six-week course designed for today’s technology-based information systems used in agricultural business decision making and will help participants build a network of professional and personal support.

To learn more about the national Annie’s Project initiative, visit www.extension.iastate.edu/annie/index.html
